INTU FR BOARD A

Fire rated ablative board

TDS Technical Data Sheet

.INTUSEAL®
passive fire protection manufacturer

→ PRODUCT DESCRIPTION

The firestop board **INTU FR BOARD A** is composed of a mineral wool board with density 150kg/m³ and thickness 60 mm, covered on one side with ablative paint **INTU FR COAT A**. The product set is designed for sealing fire protection penetrations and preparing fire expansion joints with fire resistance class up to **EI 240**. In the fire conditions, under the influence of high temperature, endothermic reactions take place in the product. The paint absorbs heat, significantly delaying the impact of fire on structural components.

→ APPLICATION

INTU FR BOARD A is used for:

- fire protection of penetrations with single or group of non-flammable pipes in floors or walls
- protection of expansion joints in floors or walls
- fire protection of electric cables combined with intumescent paint **INTU FR COAT I** in walls

Rigid walls:

The wall must be minimum thickness 150mm. Must have concrete, cellular concrete or masonry structure, with minimum density 600 kg/m³.

Rigid floors:

The floor must be minimum thickness 150mm. Must have concrete, cellular concrete or masonry structure, with minimum density 1700 kg/m³.

→ AVAILABILITY

Product	Thickness	Dimension	Pallet	Article number
INTU FR BOARD A 1S	60 mm	1200x600 mm	64	INBA601SI

→ INSTALLATION METHOD

1. Clean the hole surface and system components from grease and other contaminants thoroughly.
2. Cut the **INTU FR BOARD A** to correct size.
3. Place the **INTU FR BOARD A** in the hole/gap.

Application cases	
non-flammable pipes	expansion joints
Apply on pipe mineral wool insulation ($\rho \geq 37 \text{ kg/m}^3$). Paint mineral wool board and a part of the insulation by INTU FR COAT A according to solution details below.	Put loose mineral wool ($\rho \geq 50 \text{ kg/m}^3$) or mineral wool board in gap of 100 mm depth. Paint mineral wool board with INTU FR COAT A on one side of the partition. Prepare a partition overlap min 5 mm.

→ TRANSPORT AND STORAGE

Store in dry and cool conditions at temperatures between + 5°C and + 25°C. Shelf life as specified on the product label.

→ COMPLIANCE

- Reference standard:
penetration seals: EN 1366-3 / ETAG 026-2
/ EAD 350454-00-1104
linear joint seals: EN 1366-4 / ETAG 026-3
/ EAD 350141-00-1106

► TECHNICAL DATA for linear joints

Possible orientation of linear joints seals

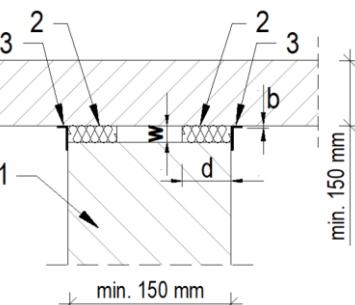

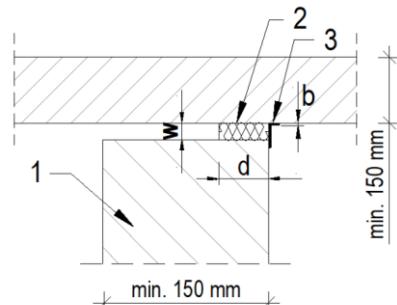

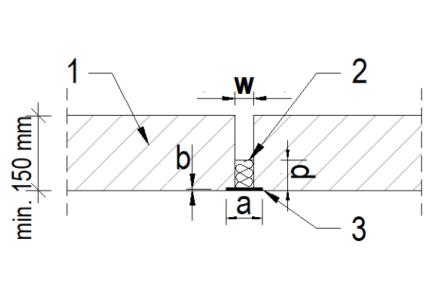

Fire resistance for linear joints in RIGID FLOOR gap with total width $w \leq 100$ mm

Orientation: **A**
 $d \geq 100$ mm (depth of wool)

Orientation: **D**
 $d \geq 100$ mm (depth of wool)

Orientation: **D**
 $d \geq 50$ mm (depth of wool)

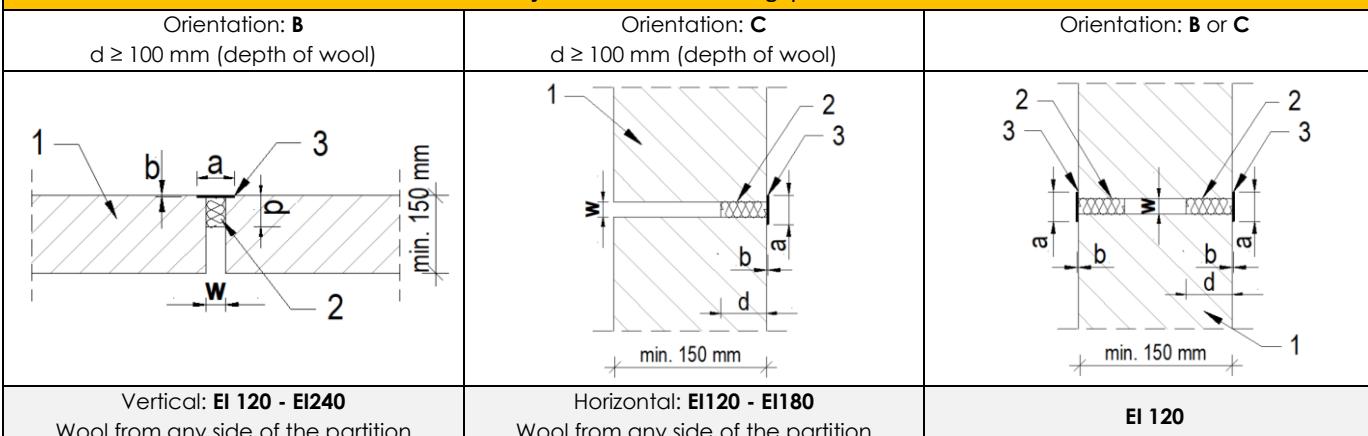

EI120
Wool from any side of the partition

EI120 - EI240
Wool from any side of the partition

EI120
 $d \geq 50$ mm (depth of wool)

Fire resistance for linear joints in RIGID WALL gap with total width $w \leq 100$ mm

Vertical: EI 120 - EI240
Wool from any side of the partition

Horizontal: EI120 - EI180
Wool from any side of the partition

EI 120

1 – wall / floor with thickness ≥ 150 mm; gap with total width $w \leq 100$ mm;

2 – INTU FR BOARD A

3 – coating of INTU FR COAT A on the mineral wool and wall (on one side of the wall):

- length $a \geq W + 2 \times 5$ mm (the wall is covered on the width of at least 5 mm from the both edges of linear joint)
- thickness $b \geq 1,0$ mm (on the mineral wool) or $b \geq 0,6$ mm on the wall
